DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenberg et al. (US Pat. 6,579,544).

Rosenberg et al. disclose dietary supplements for treatment of various degenerative conditions, such as osteoporosis and Alzheimer's (Column 1, lines 1-37). It is disclosed that the various vitamins and minerals various functions including, development of collagen and wound healing, promotion of growth and good muscle tone, growth in children (See entire document, especially, columns 9-12). It is disclosed that the vitamins include Vitamin D, Vitamin K, Vitamin C, Thiamin, Riboflavin, Pyridoxine, folate and B12 and that the minerals include calcium, magnesium, boron (Columns 12-16).

The difference between the prior art and the claimed invention is that the prior art does not expressly disclose a method of facilitating or maintaining collagen formation or treating collagen-related conditions with multivitamin and mineral formulations containing folic acid. However, the prior art amply suggest the same as the prior art discloses multivitamin and mineral formulations that contain folate as well as other vitamins and minerals as indicated above and that one or more vitamins and minerals assist in collagen formation, wound healing, treatment of osteoporosis, Alzheimers, growth and muscle tone, etc.. As such, one of ordinary

Art Unit: 1616

skill in the art would have been motivated to formulate a nutrient supplement with combinations of said vitamins and minerals with the expectation that the combination would be effective in promoting collagen formation and treating collagen related conditions.

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.

Conclusion

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier number for accessing the facsimile machine is 571-273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank Choi whose telephone number is (571)272-0610. Examiner maintains a compressed schedule and may be reached Monday, Tuesday, Thursday, Friday, 6:00 am – 4:30 pm (EST).
